BUDGET OF THE UNITED STATES GOVERNMENT

---

*Fiscal Year 1999*

## THE BUDGET DOCUMENTS

**Budget of the United States Government, Fiscal Year 1999** contains the Budget Message of the President and information on the President's 1999 budget proposals. In addition, the *Budget* includes the Nation's first comprehensive Government-wide Performance Plan.

**Analytical Perspectives, Budget of the United States Government, Fiscal Year 1999** contains analyses that are designed to highlight specified subject areas or provide other significant presentations of budget data that place the budget in perspective.

The *Analytical Perspectives* volume includes economic and accounting analyses; information on Federal receipts and collections; analyses of Federal spending; detailed information on Federal borrowing and debt; the Budget Enforcement Act preview report; current services estimates; and other technical presentations. It also includes information on the budget system and concepts and a listing of the Federal programs by agency and account.

**Historical Tables, Budget of the United States Government, Fiscal Year 1999** provides data on budget receipts, outlays, surpluses or deficits, Federal debt, and Federal employment covering an extended time period—in most cases beginning in fiscal year 1940 or earlier and ending in fiscal year 2003. These are much longer time periods than those covered by similar tables in other budget documents. As much as possible, the data in this volume and all other historical data in the budget documents have been made consistent with the concepts and presentation used in the 1999 Budget, so the data series are comparable over time.

**Budget of the United States Government, Fiscal Year 1999—Appendix** contains detailed information on the various appropriations and funds that constitute the budget and is designed primarily for the use of the Appropriations Committee. The *Appendix* contains more detailed financial information on individual programs and appropriation accounts than any of the other budget documents. It includes for each agency: the proposed text of appropriations language, budget schedules for each account, new legislative proposals, explanations of the work to be performed and the funds needed,

and proposed general provisions applicable to the appropriations of entire agencies or group of agencies. Information is also provided on certain activities whose outlays are not part of the budget totals.

**A Citizen's Guide to the Federal Budget, Budget of the United States Government, Fiscal Year 1999** provides general information about the budget and the budget process for the general public.

**Budget System and Concepts, Fiscal Year 1999** contains an explanation of the system and concepts used to formulate the President's budget proposals.

**Budget Information for States, Fiscal Year 1999** is an Office of Management and Budget (OMB) publication that provides proposed State-by-State obligations for the major Federal formula grant programs to State and local governments. The allocations are based on the proposals in the President's budget. The report is released after the budget and can be obtained from the Publications Office of the Executive Office of the President, 725 17th Street NW, Washington, DC 20503; (202) 395-7332.

### AUTOMATED SOURCES OF BUDGET INFORMATION

The information contained in these documents is available in electronic format from the following sources:

**CD-ROM.** The CD-ROM contains all of the budget documents and software to support reading, printing, and searching the documents. The CD-ROM also has many of the tables in the budget in spreadsheet format.

**Internet.** All budget documents, including documents that are released at a future date, will be available for downloading in several formats from the Internet. To access documents through the *World Wide Web*, use the following address:

## INTRODUCTION

The Budget Information for States (BIS) report provides State-by-State actual obligations for fiscal year 1997 and estimated data for 1998 and 1999 for the major Federal formula grant programs to State and local governments. The allocations are based on the proposals in the Administration's *1999 Budget*.

The Budget Information for States report is compiled in partial fulfillment of Title VIII of the Congressional Budget and Impoundment Control Act of 1974 (P.L. 93-344), 31 USCS § 1112(f). The Act as amended states that the executive branch "... (to the extent practicable) shall provide State and local governments with fiscal, budget, and program information necessary for accurate and timely determination by those governments of the impact on their budgets of assistance of the United States Government."

This year's report contains data for 147 formula grant programs and selected project grants, a total of \$238.2 billion for 1999. These programs make up approximately 88 percent of the total grants to State and local governments. The major programs not included are project grants, which are awarded on a competitive basis.

### **Summary Tables by State and by Program**

The first summary table shows the distribution of obligations by State. To display comparable year-to-year amounts, the State totals include only amounts that could be distributed in all years. The memorandum entry includes the amounts that could not be distributed, primarily new programs proposed in the *1999 Budget* and the predecessor programs.

The second summary table shows the distribution of obligations by program.

### **Program Tables**

The individual program tables displays obligations for each program on a State-by-State basis. The information was prepared

by the Federal agencies based on the Administration's 1999 budget request.

Each table reports the following information:

- The Federal agency that administers the program.
- The program title and number(s) as contained in the Catalog of Federal Domestic Assistance.
- The budget account number(s) from which the program is funded.
- Actual 1997 obligations by State, Federal territory, and Indian tribes in thousands of dollars. Undistributed obligations shown at the bottom of each page are generally project funds that are not distributed by formula, or programs for which State-by-State data are not available.
- Estimates of 1998 obligations by State from previous budget authority, from new budget authority, and total obligations, which are based on the 1999 budget request, unless otherwise noted.
- Estimates of 1999 obligations by State, which are based on the 1999 budget request, unless otherwise noted.
- The percentage share of 1999 estimated program funds distributed to each State. The percentages may assist States in re-estimating their shares if the program totals change as the budget proceeds through the congressional budget process. Calculations for percentages exclude undistributed amounts.

### **State Tables**

The State tables display the obligations for all the programs contained in this year's report for a particular State or territory. The programs are arrayed by agency and include the actual 1997 obligations and estimated obligations for 1998 and 1999.

Each State table shows three totals:

- The first total includes only programs distributed in all years, in order to make comparisons from year-to-year of the sum of these programs.
- In the memorandum entry, the line "Not distributed by State in all years," is the sum of programs designated by a footnote. These are primarily programs that are not distributed in all years or are not comparable from year to year because of program transfers or other reasons.
- The total, including memorandum items, is the sum of the amounts distributed and not distributed in all years.

Further information regarding major proposals affecting grant programs can be found in the *1999 Budget*. For a detailed listing of budget authority and outlays for all grants in the *1999 Budget*, see Table 9-3, "Federal Grants to States and Local Governments—Budget Authority and Outlays" in Chapter 9: "Aid to State and Local Governments," in the *Analytical Perspectives* volume of the *1999 Budget*.

### **Programs Not Distributed by State in All Years**

To help the reader make the proper comparisons, the summary table and the State tables show State totals with estimates that are comparable from year to year. A memorandum entry shows programs or program areas that are not comparable because they cannot be distributed in all years, and a sum of the comparable and noncomparable lines.

There are several reasons for a program to be in the "Not distributed by State in all years" lines in the State tables:

- The program is a new proposed program.

- The program is being phased into a new program.
- Information required to determine the distribution is not yet available (e.g., State-by-State unemployment rates).

This information is identified in the footnotes in many of the program tables.
